INTRODUCTION

This educational program (hereinafter - EP) is a normative document of a conceptual nature, based on the goals and values of university education, containing general information about the professional activities of graduates, aims and objectives of EP of competence graduate model, the expected learning outcomes and policies of their evaluation of methods and methods of organization of educational process on the content of the program.

The main directions of EP:

- implementation of the educational policy of the University;
- implementation of trilingual education through the organization of educational process in the Kazakh, Russian and English languages;
 - improving the quality of the learning process on the basis of competence approach;
 - the willingness of students to educate themselves throughout their lives;
- formation of the outlook of students, develop their creativity, communication, critical thinking, research and information capabilities.

EP is the basis for the development of the following documents:

- Catalog elective subjects (CES);
- Academic calendar of the educational process;
- Individual educational plan (IEP);
- Working curriculum (WC);
- Working curriculum subjects (SYLLABUS);
- Teaching materials disciplines (TMD);
- expected results in the disciplines of learning;
- criteria for assessing the results of training in the disciplines;
- organizing all kinds of professional practice, as well as other documents necessary for the educational process.

1 SHEET OF THE EDUCATIONAL PROGRAM

1.1 Scope of professional activity of graduates

Bachelor of Education OP "Training of teachers of physical culture and sports" carries out his professional activities in the field of education.

1.2 The objects of professional activity of graduates:

- basic and specialized schools;
- specialized schools;
- the organization of technical and vocational post-secondary education.

1.3 Types of professional activity of graduates:

- training;
- educative:
- methodical;
- research;
- social and communicative.

1.4 Objectives of professional activity of graduates

Training:

- training and development of students;
- the organization of educational process in professional activities;
- design and management of the pedagogical process;
- diagnosis, correction and prediction of the results of educational activities.

Educative:

- the involvement of students in the system of social values;
- implementation of educational work in accordance with the laws, the laws, the principles of the educational process, educational mechanisms;
 - planning extracurricular educational work;
 - addressing specific educational objectives;
- the use of various forms and methods of training and education of students in extracurricular activities;
 - liaising with groups of students, subject teachers and parents.

Methodical:

- implementation of methodological support of the educational process;
- planning the content of education at different levels;
- identification of methods for the organization and implementation of the educational process;
- the use of new educational technologies in the learning process.

Research:

- the study of the level of assimilation of the content of education, the study of the educational environment;
 - the development of scientific and methodical literature;
 - analysis and generalization of the advanced pedagogical experience in the field of education;
- conducting of pedagogical experiment, the introduction of its results in the educational process.

Social and communicative:

- the implementation of cooperation with the professional community and all interested education stakeholders;
 - the formation of a multicultural identity;

- creation of favorable conditions for education and development of students and provide them with educational support.

2 SOFTWARE FEATURES OF EDUCATIONAL

Subdivision of higher education, "Training of teachers of physical culture and sports" was developed in accordance with the European Qualifications Framework, National Qualifications Framework, the Dublin descriptors, Industry frame of qualifications, professional teacher standards to meet the requirements of the regional labor market and employers.

OP determines goals, expected results, conditions and techniques of the educational process, the realization of quality assessment preparation graduate in this area, the contents of the working curriculum.

3 PURPOSE AND VALUES EDUCATION PROGRAM

3.1 The purpose and objectives of the educational program

The main objective of OP is defined in accordance with the objectives of the Strategic Plan and the development of the University's mission.

Purpose of the Educational Program: Teacher training for physical education and sports in accordance with the requirements of the labor market and the National qualification system.

Tasks of the educational program:

- formation of core competencies needed for effective implementation of the professional activities of students;
- ➤ the formation of social responsibility training based on interpersonal values and professional ethics;
- ➤ bringing the level of quality of education in line with the requirements of national and international standards on the basis of motivation of training to professional development, self-realization;
- ➤ the formation of students' professional knowledge and practical skills based on the updated content of education;
- > providing training of highly educated professionals who are actively involved in the modernization of society on the basis of language trinity, functional literacy, healthy lifestyle.

3.2 Values of the Educational Program

The core values defined in the contents of EP:

- * Kazakhstan patriotism and civic responsibility;
- honesty;
- * respect;
- cooperation;
- openness.

4 GRADUATE MODEL

- **1. Subject knowledge:** owns a deep and complete understanding of their subject area, applies knowledge in professional activities
- **2. Organizational and methodological abilities:** uses innovative technologies in the planning, organization and management of professional activities, shows critical thinking and creativity in solving complex problems.

- **3. Research skills:** conducts scientific and methodological work, introduces students to research work.
- **4. Leadership and entrepreneurial skills:** knows how to work in a team, is active in the process of updating society.
 - **5.** Cultural competence: has the ability to be a cultural and tolerant citizen of his country.
- **6. Lifelong learning ability:** coordinates its abilities and interests in accordance with the needs of society.
- **7. Information skills:** understands the essence of the information society, uses ICT in professional activities.

5 EXPECTED RESULTS training on educational programs

Learning outcomes of EP: Upon successful completion of this EP student must:

- LO 1 demonstrate knowledge, understanding and integration of knowledge in the main sections of the subject and interdisciplinary field;
 - LO 2 apply the knowledge of domestic and foreign systems of physical culture and sports in practice, based on their features of interconnection and interaction;
 - LO 3 determine the structure, basic concepts and means of research of the subject to attract students to critical thinking, creative and joint problem solving;
 - **LO 4** actively use the methods of cognitive activity of students with a scientifically based approach to ensuring the effectiveness of the training process;
 - LO 5 use the technology of criterion assessment in the implementation of the system of selection and orienteering in the chosen sport;
 - LO 6 use ICT and digital educational resources in educational and sports-professional activities;
 - LO 7 demonstrate interpersonal communication, teamwork skills and information culture;
 - LO 8 use innovative technologies in accordance with the goals and objectives of training and education, the expected results and physiological characteristics of students;
 - LO 9 use modern methods and diagnostics to determine the individual's anthropometric, physical, and psychological parameters.
 - LO 10 give importance to lifelong learning for their professional growth and the development of student personal development;

6 Learning outcomes assessment policy

The technology of criteria-based assessment is used for all types of students' educational achievements control (everyday, midterm and final). The assessment is carried out according to the letter-point system showed at the table below

Students' educational achievements point-rating and letter evaluating system, their conversion into the traditional grading scale, ECTS

Evluation by letter system	Digital equiv- alent	Points (% content)	Evaluation according to the traditional system
A	4,0	95-100	
A-	3,67	90-94	excellent
B+	3,33	85-89	excellent
В	3,0	80-84	
B-	2,67	75-79	
C+	2,33	70-74	
С	2,0	65-69	satisfactory

C-	1,67	60-64	
D+	1,33	55-59	
D-	1,0	50-54	
FX	0,5	25-49	unsatisfactory
F	0	0-24	

The semester long students' educational achievements evaluation is carried out 3 times during one semester every 5 weeks. In each period of the current control, the teaching staff evaluates students at practical, laboratory, seminar, SSW (SSWT/SSW) and other classes, the total score of each final week of the current control is automatically displayed in the Univer system

The final ranking score for the semester is the sum of 20% of the total sum of the three final weeks of control. It makes up 60% of the final assessment of the student, and he gains the remaining 40% on the exam.

The student will be admitted to the exam only if he scores at least 30 points (passing point $0.2 * (CC1 + CC2 + CC3) \ge 30$ points) from the current control

The result of the interm attestation is calculated by the following formula:

the current control 1 (CC1) \leq 100 the current control 2 (CC2)) \leq 100 the current control 3(CC3) \leq 100 Exam (E)) \leq 100

Final assessment (FA) = 0.2*(CC1+CC2+CC3)+0.4*E

Consistency of learning outcomes and assessment methods

7 ways and methods of organization of educational process

Organization of educational process is carried out on credit technology based on the choice of studying the discipline, order the development of disciplines and modules.

Tasks of the organization of educational process:

- unification of knowledge;
- creation of conditions for maximum individualization of instruction;
- strengthening the role and effectiveness of independent work of students;
- Identification of educational achievements of students on the basis of an efficient and transparent procedures for their control.

Training opportunities on credit technology:

- the introduction of academic credits system to assess the labor costs of students and teachers in each discipline;
 - participate in the formation of the individual curriculum;
 - the choice of subjects and modules in the catalog of elective courses;
 - the freedom to choose teacher training;
 - the choice of an educational path with the help of student advisors;
 - the use of interactive teaching methods;
 - academic freedom in the formation of educational programs;
 - providing of training necessary teaching and learning materials;
 - the use of effective methods of control of educational achievements of students;
- the use of score-rating system of evaluation of educational achievements of each discipline, and other forms of self-study.

The methods and technologies of training:

- reflexive techniques considered as a central object of study;
- competence-based approach to learning;
- role-playing games;
- educational discussions;
- Case Study;
- design methods;
- flipped learning;
- ways of adaptation;
- **s** gamification.

Types of methods and technologies of training to choose the teachers themselves.

Adaptive technologies used for students with special educational needs (SEN).

For students with special educational needs (SEN), the following forms of organization of the educational process and knowledge control are provided:

for the visually impaired there is an opportunity:

- the use of training and handouts printed in large print;
- the use of reference notes for recording lectures;

Opportunities for the deaf and hard of hearing:

- to take a comfortable place in the audience;
- the use of visual reference diagrams in lectures to facilitate understanding of the material;
- preferential performance of educational tasks in writing;
- increasing the time for the analysis of educational material.

The main form of organization of the educational process in groups with SEN is integrated learning, i.e. all students study in mixed groups for adaptation in society. For students with special educational needs, it is planned to provide educational and methodological aids in printed and electronic forms in agreement with the lecturer conducting the classes.

For students in groups with special educational needs are given the opportunity of distance learning, in case of deterioration of their health status, which has the conclusion of a medical advisory commission

internal quality assurance system educational activities aimed at improving the quality of educational services is determined by:

- policy in the field of quality assurance;
- development and approval of ongoing educational programs;
- studentorientirovannym learning, teaching and assessment;
- admission of students, academic performance, recognition and certification;
- teaching staff;
- training resources and support training systems;
- information management;
- informing the public;
- continuous monitoring and periodic program evaluation;
- periodic external quality assurance.

Professional practice

Professional practice is a required component of study the student.

In accordance with the specific OP organizes the following practices:

- training;
- language (voice);
- teaching;
- Production;
- pre-diploma.

The purpose of the training practice - the acquisition of primary professional competences, including the consolidation and deepening of theoretical knowledge acquired during the training, laying the foundations of research, paperwork and working with business correspondence, acquisition of practical skills and work skills.

Teaching practice is organized for all students, is conducted in accordance with the characteristics and direction of the OP, is considered at a meeting of the department and is reflected in the program of practice.

The purpose of teaching practice - consolidation and deepening of knowledge of general scientific, cultural, psychological and pedagogical, methodical and special disciplines, as well as the formation on the basis of theoretical knowledge of pedagogical skills and competences.

Internship held in institutions, organizations and enterprises, relevant profile training of students.

Undergraduate practice carried out on senior year for students who perform graduate work. Manual pre-diploma practical exercises supervisor of the thesis.

8 CONTENT OF THE EDUCATIONAL PROGRAM

8.1 Correspondence of learning outcomes of EP to graduate model

Learning outcomes define competences of students, formed after the completion of the EP.

11	Pedagogy and psy-	Formation of knowledge about the laws,									i
	chology of physical	principles, methods and forms of organization of									ì
	culture and sports	pedagogical (educational) process in the field of									
		physical culture and sports using domestic and									
		foreign experience. Training of sports	6	+	+	+					
		psychology, technical, tactical and physical									
		preparation, psychological bases of trainings and									
		competitions, psychological aspects of									
		preparation of athletes.	 								
12	Theory and	Knowledge of domestic and foreign systems,								+	
	methodology of the	skills in selected sports are applied. The									
	chosen sport	organizational structure and concepts of sports	7								
		management, current problems of sports		i							
		development are considered. Classification,		+		+	+				
		systematization, terminology, methods and									
		technologies, types of sports training,									
		development of physical qualities are studied.									
		Planning, selection, and control. Training, team									
		training camps and competitions.									
13	Age-related	Mastering the system of knowledge in basic									
	features of training	sports, acquiring skills of creative cooperation,									
	in basic sports	knowledge of modern methods in the field of									
	(according to the	physical culture and sports, innovative projects	5	,				,			
	updated school	in the educational process, features of the		+	+	+		+	+		
	program)	methodology for developing physical qualities,									
		depending on physiological characteristics,									
		performing professionally important motor									
		actions, applying the rules of insurance and self-									
		assessment when teaching basic sports.									
14	Methods of	Forms of systematized knowledge, the basic	6								

			I	1		l		I I		1	1	
	teaching national sports.	concepts in the theory, methods and practice of national sports, defines the study of the history				١.			+			i
	-F	of national sport, active games, neobhodimosti.		+		+			+			+
		There are forms of training collective, group,										
		individual, which involves the positive formation										
		of personality and communication in										
		communication.										
15	Management of	The course is intended for students of the subject	5									
	physical culture	area of the theory of social management		+	+				+			
	and sports.	organizations of physical culture and sports in		'	'				'			
	-	the market economy, improving the economic										
		mechanism of organizations, making										
		economically sound management decisions and										
		the use of financial knowledge in practice.										
16	Anatomy and	The purpose of this course is to provide students	6									
	basics of sports	with knowledge about the structure, functioning										
	morphology	of the human body, the basic laws of growth,										
		development, diagnosis to determine the		+						.		
		anthropometric, physical parameters of children								+	+	
		and adolescents, the features of sports										
		morphology of athletes.										
17	Therapeutic and	Adaptive physical culture is a complex of sports	8									
	Adaptive physical	and recreational activities aimed at adapting to										
	training	the normal social environment of disabled						+		+	+	
		people, overcoming psychological barriers that						-		-	·	
		prevent a sense of a full life, taking into account										
		their own needs. The goals of the maximum										
		development of the vitality of a person with										
		persistent deviations in health, ensuring optimal										
		modes of his motor activity and spiritual work										
		are determined. Apply inclusive knowledge of										
		medical and biological cycle in physical culture										
		and health activities, diagnostics to determine the										

						1			1			1	
1.0		physiological characteristics of the individual.											
18	Valeology and	The science of health, which considers one of the											
	health technologies	main tasks of the impact of environmental	5										
		factors (social and natural) on the health of the											
		population. Forms the personal development of		+		+					+	+	+
		students to preserve and promote health. Studies:		'		'						т	'
		patterns and trends in the formation of public											
		health in socio-economic conditions.											
19	Intellectual games	Intellectual sports include chess, rendza, the	5										+
		Kazakh national game Togyzkumalak, which is											
		an excellent mentor for personal development,											
		mental progression and brain functionality. In											
		the XX century, intellectual sports appeared,		+	+								
		where quality is required, which are also valued											
		in traditional sports: purposefulness, initiative,											
		professionalism, discipline, courage,											
		organization and the will to win.											
20	Methods of teach-	Popular sport, including knowledge of domestic	5									+	
	ing Gymnastics	and foreign systems for the use of gymnastic											
		apparatus, base jumping, studying exercise											
		developing flexibility, agility, endurance; used									.		
		innovative technology based assessment of			+			+			+		
		physiological characteristics in the											
		implementation of the selection system, sports											
		orienteering. Sports types of gymnastics include:											
		sports, artistic, acrobatic gymnastics.											
21	Methods of	Discusses the characteristics, direction of	 6									<u>-</u>	
	teaching athletics	athletics, the possibility of conducting training,											
		physical training, types and methods of training		+	+		+	+		+	+		
		their practical application. The ways of ensuring		Т			Т			Т			
		the effectiveness of the training process, criteria-											
		based evaluation of the orienteering system,											
		communicative communication, the use of											

	T			ı			I		1	1			1 1
		innovative technologies are described.											
22	Pedagogical skills	The program of pedagogical mastery of selected											
	of the chosen sport	sports theory and methods of teaching, teaches											+
		the basics of pedagogical mastery in a selected											
		sport. To form the need for future teachers to											
		constantly improve the art of teaching and		5	+		+				+	+	
		upbringing, self-improvement, to promote the											
		development of general culture and pedagogical											
		abilities.											
23	Kind of struggle	The main goal of each of the many types of		4									
		martial arts is to effectively attack the enemy or											
		defend against his attack. Martial arts are divided								+	+		
		into wrestling, percussion, and Oriental arts (they											+
		include not only the study of techniques, but also											
		the philosophy of combat and life). Types of wrestling, martial arts and martial arts are											
		included in the program of the Olympic games.											
		These include Boxing, freestyle and Greco-											
		Roman wrestling, and judo.											
		Roman wrestning, and judo.			1	1							
		Cycle of profi	le disci	plines									
		Component		-									
		00111 -		0100									
24	Basketball and	Examines the methods, teaching techniques,				+							
	handball teaching	individual stages of the training process for the											
	methods	implementation of the system of orienteering in		6									
		basketball, handball, apply innovative											
		technologies, advanced techniques, diagnosis,						+			+		
		anthropometric, physical parameters of the											
		individual to determine the effectiveness of the											
		techniques and tactics of the training process.											
		Improves physical qualities in accordance with											
		the physiological characteristics of athletes.											

	Г		-		, ,	-		-	ı		1	
		Gameplay is determined by the presence of										
		technology, tactics, strategy.										
25	Volleyball teaching	Introduction of volleyball, table tennis in the		6			+					
	methods	system of physical education with technical										
		procedures and tactical actions, the study of										
		performance improvement techniques in							.			
		conditions close to the game, the development of					+	+	+	+		
		techniques in game situations. Learn to develop										
		physical qualities in volleyball, develop										
		coordination, speed, endurance, flexibility,										
		agility.										
26	Methods of teach-	Studies the prospects of football, the evolution of										
	ing football and	tactics and rules of the game, the technique of		6								
	mini football	movement in football. Provides requirements for										
		physical training in attack and defense at the							.			
		initial stage of sports training, hygiene and safety					+	+	+	+		
		of players in the training process.										
27	Methods of teach-	Teaches skills of swimming and consistent		6								
	ing swimming	study, development of individual elements of										
		swimming and their coordination, accompanying										
		the development of motor qualities of strength,					+	+	+			
		speed, endurance, flexibility and agility.					т	т		+		
		Swimming classes create favorable conditions										
		for aesthetic education involved in accordance										
		with physiological characteristics.										
28	Applied physical	The discipline is aimed at the acquisition of		6								
	culture and sport	students ' knowledge, skills, sports and										
		recreational activities, manifested in the ability										
		to independently conduct classes to promote					+		+	+		+
		health, improve physical development and					T		T	Т		T
		physical fitness, both in terms of educational										
		activities and in various forms of active										
		recreation and leisure.										

29	Improvement of	Improvement of physical qualities, the							
	physical properties	relationship of motor skills. The complex	6						
		process of improving the morphological and the							
		functional properties of an organism is realized					_		
		by definition of anthropometric, physical, and			+		+	+	
		psychological parameters of an individual (rate							
		of growth, the growth of body mass, maturation							
		of various organs)

WORK CURRICULUM

Code and classification of the field of education: 6B01 Pedagogical Sciences

Code and classification of training course: 6B014 Teacher training with subject specialization og general development

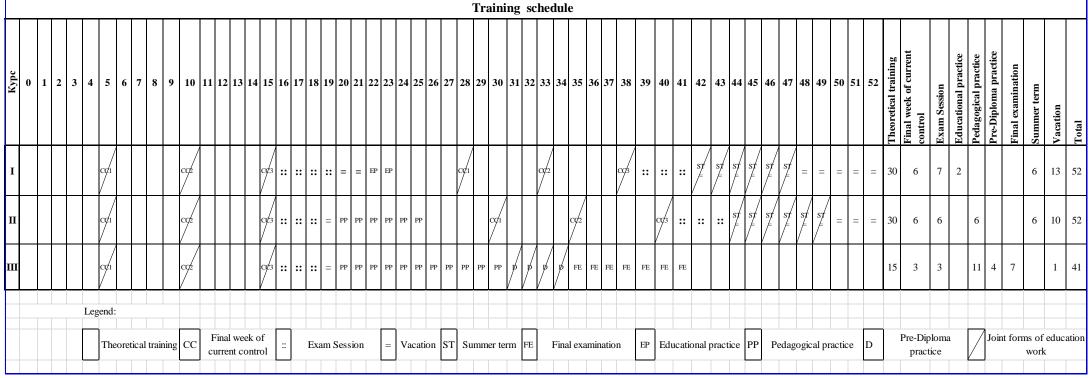

Educational program: 6B01402 Training of a teacher of physical culture and sports

Awarded degree: Bachelor of Education in the educational program 6B01402 Training of a teacher of physical culture and sports

Training period: 3 years

Type of study: daytime, abbreviated

For applicants in the 2022-2023 academic year

WORK CURRICULUM

Code and classification of the field of education: 6B01 Pedagogical Sciences

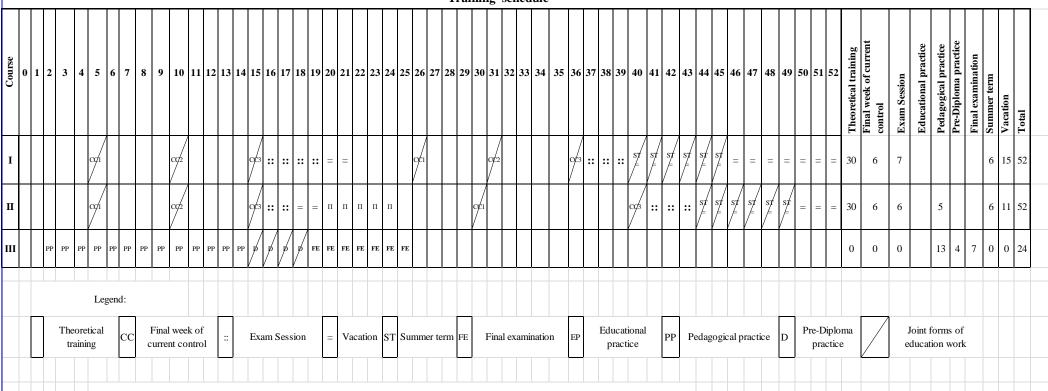

Code and classification of training course: 6B014 Teacher training with subject specialization of general development

Educational program: 6B01402 Training of a teacher of physical culture and sports

Awarded degree: Bachelor of Education in the educational program 6B01402 Training of a teacher of physical culture and sports

Training period: 2,5 years
Type of study: daytime, accelerated

For applicants in the 2022-2023 academic year Training schedule
